

Well Monitoring Program – Door County

(posted May 28, 2015)

Healthy Water Door County has awarded a grant to the Environmental Research and Innovation Center at UW Oshkosh to conduct a county-wide well monitoring program during the weekend of June 5 & 6 and June 12 & 13, 2015.

This program is **free** to virtually any Door County property owner or resident who would like one. Of course, if you choose to purchase a test kit, the money saved will be used to support other water projects in Door County.

The hope is that this program will be the start of a long-term initiative to promote high quality drinking water while providing a convenient way for Door County residents to monitor their well water.

Over both weekends, residents will be able to pick up testing kits and ask questions of the experts on hand from UW Oshkosh. Water samples may then be brought back to the pick-up sites that same day, the next day, or the following week for analysis. The well water tests include a bacteria, nitrate and arsenic test, funded by Healthy Water Door County.

Test Kits may be picked up and dropped off at the following locations:

Friday, June 5th, from 4 p.m. to 7 p.m.

Saturday, June 6th, from 9 a.m. to Noon

Crossroads at Big Creek – 2041 Michigan Street, Sturgeon Bay, WI 54235

Sister Bay Liberty Grove North Fire Station - 1487 Highway 42, Ellison Bay, WI 54210

Clay Banks Town Hall – 6098 County Road OO, Sturgeon Bay, WI 54235

Friday, June 12th, from 4 p.m. to 7 p.m.

Saturday, June 13th, from 9 a.m. to Noon

Crossroads at Big Creek – 2041 Michigan Street, Sturgeon Bay, WI 54235

Town of Liberty Grove - 11161 Old Stage Road, Sister Bay, WI 54234

Clay Banks Town Hall – 6098 County Road OO, Sturgeon Bay, WI 54235

For more information about well testing, contact Caitlin Koller of the Environmental Research and Innovation Center at UW Oshkosh at (920) 424-0763, or email kollerc@uwosh.edu.
